DENTAL RESOURCES

Florida Medicaid

Contact your local office of the Florida Children and Family Services Public Assistance Unit to get additional information or to apply.

If qualified, Florida Medicaid provides adult denture services rendered by licensed, Medicaid-participating dentists. Medicaid reimbursable adult denture services are provided to recipients age 21 and older. Services include:

- ✓ Diagnostic examination;
- ✓ Radiographs (x-rays) necessary to make a diagnosis;
- ✓ Dentures;
- ✓ The procedures required to seat the dentures;
- ✓ Extractions and other surgical procedures essential to the preparation of the mouth for dentures, if the recipient is to receive dentures; and
- ✓ Repairs and relines of the dentures, if warranted.

Limitations:

Medicaid recipient is limited to one set of dentures, upper or lower or both, for the life of the recipient. Relines are limited to one per denture, per 12 month period.

Project Dentist Care, Inc.

Call local dental society or association to learn if there are any dentists in your area who participate in the program.

Project Dentist Care, Inc. is a free or low-cost program that depends on dentists to volunteer their services. Dentists are not required to participate.

Most Florida community colleges have dental hygiene courses and offer low-cost dental cleaning and x-rays. There are two dental schools in Florida, the University of Florida in Gainesville, and Nova Southeastern University in Ft. Lauderdale. Both of the schools have clinics that offer many dental services at lower cost than those charged by dentists in private practice. The services provided in the university dental clinics are performed by students who are supervised by teaching professional dentists. (See attached list of dental schools and dental hygiene schools.) *(Miami: Dade Com. College & Nova University)*
